State Priority Assessment Justification:

Additional information on this site indicates that: 11 years of oiling roads for dust control at Cummins Engine Co. Employees' Recreational Facility. All roads are black topped now. Area used by employees and their families on property. Population affected greater than 10,000. Lake used for fishing and boating. Bioaccumulation in fauna may have occurred. Possible PCB's in waste oil.

State Comments Re: X PA SI Follow-up SI RPS HRS
Area is 320 acres or 1/2 section; over 4 million gallons of wastes were spread to control dust in an 11 year time frame. That averages 370,909 gallons per year. Waste oil contained small amounts of solvents, acids and bases. Waste oil contains possible PCB's and 1-2 1,1,1 Trichloroethane. Some soil sampling and well sampling has been done. Entire county road, parking lot and 1 1/2 miles of internal roads. 7 wells on property. Population based on 2,500 employees using facility, with wife and 2 children also using facility. Cummins has had at least 5,000 employees in any given year. If 50% of the employees used it, then 10,000 is a conservative figure.
